

MARKET SNAPSHOT: CARDIOLOGY

Nationwide, healthcare facilities are in need of cardiology physicians and advanced practice providers. However, demand for cardiology clinicians continues to outpace supply. The ongoing shortage of providers, including specialists, is compounded by the increasing healthcare needs of individuals across our nation, particularly patients in aging, rural and minority populations.

- **An aging U.S.** Our nation is growing older: the 65-and-older population is expected to nearly double in size from 49 million in 2016 to 95 million in 2060 ([U.S. Census Bureau](#)). And cardiovascular disease is the leading cause of death among older adults ([AHA Journal](#)).
- **Widespread chronic conditions.** Most American adults 65 and older have at least one chronic condition, many of which are heart-related, including hypertension (54%), coronary heart disease (14%), myocardial infarction (9%) and angina (4%) ([U.S. Department of Health and Human Services](#)).
- **Rural health needs.** Approximately 15-19% of the U.S. population (46-60 million people) live in rural areas ([U.S. Health Resources & Services Administration](#)). Individuals living in rural areas have an overall 19% higher risk of developing heart failure ([JAMA Cardiology](#)).
- **Disparities in care.** In the U.S., compared with whites, members of minority groups have a higher burden of chronic diseases, including heart disease. They also receive lower quality of care and have less access to healthcare ([Cleveland Clinic Journal of Medicine](#)).

Demand For Cardiology Physicians and APPs

There's a significant demand for cardiology providers, yet shortages make these positions extremely difficult to fill. Over the last year, more than 1,000 employers posted nearly 35,000 cardiology jobs, but only 1 out of 7 cardiologist positions, 3 out of 5 cardiology NP positions, and 2 out of 3 cardiology PA positions were filled during that same time period.

Cardiologists	1,238 Employers Competing	18,651 Unique Job Postings	1 Out of 7 Positions Filled
Cardiology Nurse Practitioners	1,242 Employers Competing	12,870 Unique Job Postings	3 Out of 5 Positions Filled
Cardiology Physician Assistants	586 Employers Competing	3,125 Unique Job Postings	2 Out of 3 Positions Filled

Supply of Cardiology Physicians and APPs

Tens of thousands of cardiologists and cardiology APPs plan to retire soon, further reducing supply.
